## Data Repair & Migration Solutions for Business

We understand that it can be a time of distress when the data is corrupted or throwing an error while migrating from one platform to another. Stellar helps business in repairing, converting and migrating files, database, database objects and mailboxes with 100% data integrity.

### Database & File Repair

We offer Database and File repair services which can get back your corrupted MYSQL, MS Access, QuickBooks, DB2, and other type of files in original form.

### Email Repair

Our Experts can help you in repairing outlook mailbox, all PST files which are severely corrupted or encrypted. We help to manage mailboxes and migrate them from one email client to another.

### Email Converter

Our professional services can convert online as well as offline Exchange Server Database (EDB) files into Outlook PST files. We can perform Single or Multiple Mailboxes Extraction as per requirement.

### DIY SOFTWARE

## Professional Data Sanitization of Your Sensitive Data Against any Potential Data Compromise

It is imperative that before disposing off IT assets or transferring the assets, all the data is permanently destroyed. Since formatting is not a secure way of data erasure, our certified data sanitization services ensure that the data once destroyed cannot be recovered by any means thereby preventing any data leakage.

### Data Erasure Services

Our Professional, Certified Data Erasure services erases confidential data beyond recovery from all storage devices.

### E-waste Management

For 100% eco-friendly safer recycling & disposal of electronic waste, we channelize e-waste to registered dismantler or Recycler approved by appropriate State/Central Pollution Control Boards.

### Disk Degaussing Services

Guaranteed Data sanitization by using degaussing techniques to permanently eliminate unwanted magnetic field or data stored on disk media or tape.

### DIY SOFTWARE

### BitRaser Certified Data Erasure Solutions

BitRaser is a certified data erasure solution for securely erasing hard drives/SSDs in PCs, laptops, mobile devices, removable media, servers & other rack mounted storage devices. It meets data erasure needs of individuals, SMEs, large corporations, R2, ITADs, Govt. organizations and others. BitRaser is testified by STQC Labs, Govt. of India.

### SSD Dismantle and Destruction

At Stellar we use specialized equipment to destroy the data stored in your SSD drive. Our SSD dismantling & destruction services are 100% safe, secure and certified.

# STELLAR ADVANCED
# INFRASTRUCTURE

## stellar

Our one-of-its kind Class 100 Clean Room Labs are designed with consideration to every minute detail from automated micro-dust screening to static charge shielding. Such advance Labs are temperature, humidity, pressure and dust particles controlled. This advanced infrastructure along with team of R&D Experts ensures timely, efficient, risk free and secure data recovery with up to 100% success.

## "In most of the cases, You ONLY get a single chance to salvage your data"

At Stellar, your damaged media gets special care in Advanced infrastructure for maximum data recovery.
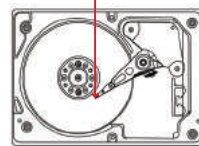

## Why Class 100 Clean Room Lab?

Hard Drives are very sensitive & must not be exposed to even fine dust particles. Exposure of hard drive outside these Labs to perform Head and/or Platter transplant operations & recover data can cause permanent & irreversible damage to the hard drive, adversely affecting data recovery possibilities. In CLASS 100 CLEAN Room Lab, we ensemble an environment to resemble the production conditions of your hard drive, thereby ensuring maximum data recovery possibilities.

## Did you know this fact?

| Distance between Read/Write Head and the platter is 0.5 microns | It is 100th part of diameter of an average human hair |
|---|---|

In a Class 100 Clean Room there are less than 100 dust particles of size 0.5 microns per cubic foot of air as against a typical air conditioned office building containing 5,00,000 to 10,00,000 particles per cubic foot of air.

### Class 100 clean room environment facilitates upto 100% Data Recovery
