STELLAR RECOVERS DATA FROM THE CLIENT'S EX

Prateek Mittal is a renowned wildlife photographer based in Gotri, Vadodara, for the last six years and is passionate about birds and animal photography. He has a dedicated website of his own, showcasing his artistic work.

THE CLIENT WAS UNABLE TO ACCESS HIS SEAGATE EXTERNAL

The client has 2.5" Seagate external HDD (Model No.: 9KW2AH-501, Serial no: 2014010101010101). Unexpectedly, the client was unable to access his external hard drive with all t

The client had his data of the last 3 years stored in the HDD and required immediate data from the inaccessible hard drive.

HOW THE CLIENT DEALT WITH THE ISSUE

The client contacted [Stellar Data Recovery – Ahmedabad](#) service centre and external hard drive suddenly stopped working without giving any warning sign. HDD has all my important wildlife photographs. Now I'm totally disturbed and need an expert to help me recover all my lifetime treasure and efforts!"

The executive at our Service Centre listened to the client's issue attentively when the client handed over his HDD to our one of the BDE in Baroda and the BDE delivered recovery.

Thereafter, the executive assured him of a successful data recovery of his important green signal to the experts for starting the process of External [Hard Drive Rec](#)

STELLAR DATA RECOVERY STEPS IN

To recover data from the inaccessible Seagate hard drive, the data recovery team scanned it thoroughly. On completion of the scan, the team was able to access. team successfully recovered 95% of the client's data and informed the client fo

THE CLIENT'S FEEDBACK

Here's what client stated at the time of the data validation: "I almost lost all hope. Stellar did an exceptional job. Stellar recovered all my photos which mean a lot of support!"
