## ABOUT OMRON AUTOMATION PVT. LTD.

Omron Automation Pvt. Ltd. an automation business company located in Gurgaon has lost data due to water-affected Sony camera

---

## GOALS

To recover clients data from the not working Sony camera

---

## APPROACH

The client contacted Stellar Data Recovery - Gurgaon branch and requested for onsite pick & drop service to recover data from the damaged camera

---

## RESULTS

Successfully recovered photos & videos from the camera

## DATA RECOVERED SUCCESSFULLY FROM THE CAMERA

Gurgaon-based automation business company founded on 18th January 2006, Omron Automation Pvt. Ltd. lost images and videos stored in a Sony camera, which accidentally fell into water then.

The company is involved in manufacturing electronic valves & tubes and other electronic components.

## CHALLENGE FACED BY THE CLIENT

The client took out the camera from the water and let it dry completely. Yet, the camera was not accessible logically when connected to a computer. In addition, the camera was not accessible logically when connected to a computer. The client wanted to access their data from the water-damaged Sony Cam Recorder.

In order to recover the data that was crucial from business point of view, the client contacted Stellar Data Recovery to recover the lost data.

## STELLAR DATA RECOVERY – GURGAON AT SERVICE

We at Stellar Data Recovery – Gurgaon received the water-damaged Sony camera and immediately transferred the camera to our data recovery specialist team for inspection and preliminary analysis.

The assigned team scrutinized the camera and found physical problem with the data storage medium. The data was not accessible logically.

To perform the intended data recovery, we requested the client to provide permission to access the camera device.

After the client's approval, our specialists accessed the storage device inside the camera. We used our proprietary data recovery software to recover almost all data from camera. They transferred the data to a safe storage medium.

## CLIENT'S FEEDBACK

We delivered the camera—with the recovered data on its storage medium—to the client. The client received the recovered data and the client was happy and appreciated our efforts for [recovering](#)
