

BitRaser for File

Files & Folders Erasure Software for PCs, Desktops, Laptops & Servers

When we say it's gone,
it's gone.

BitRaser for File, is a software with which you can permanently erase all partitions, files, folders, internet usage history, application traces and system caches leaving no residual data. You can choose between various globally recognized erasure algorithms to erase data stored in files permanently and prevent invasion of privacy. It works well on windows based laptops and desktops. This is a wonderful software to automate selective data erasure at scheduled intervals on active PCs, Laptops & Servers.

Technology you can TRUST

BitRaser is an innovation by Stellar, the global data recovery experts trusted by millions since 1993. BitRaser is created after applying decades of learning of our data recovery research, development and engineering experts.

A privacy safeguarding software for permanent data erasure

With this software, you can erase sensitive files & folders from PCs, Desktops, Laptops and Servers in the most efficient way. The software allows you to schedule erasure process and maintain detailed log reports of all the deleted files. BitRaser for File is an easy to use software, a powerful risk mitigation tool that is safe and reliable.

BitRaser Capabilities

- Securely erase sensitive data from HDDs and SSDs in PCs, Desktops, Laptops and Servers
- Performs High Speed simultaneous erasure of multiple files in the most efficient way
- Supports extensive list of 17 International erasure standards including DoD 3 passes / 7 Passes & NATO
- Generates erasure reports and certificates for audit trails
- Safe & Reliable as it does not erase operating system files
- Meet statutory & regulatory compliance needs for data security & privacy SOX, GLB, HIPAA, ISO27001,EU-GDPR, PCI-DSS.
- Easy to use application

BitRaser for File Benefits

- Protects and safeguards your privacy
- Helps maintain regulatory and audit compliances including ISO 27001
- Mitigate risks of data theft and data leakage
- Efficient, saves time & resources
- Unlimited erasures in a year

TECHNICAL SPECIFICATIONS

Certified Data Erasure

- Permanent erasure beyond scope of recovery
- Erases partitions, files & folders
- Erases application traces
- Erases system usage & internet history
- Erases Unused space
- Supports 17 International erasure standards*

Configuration & Automation

- Option to schedule erasure tasks at regular intervals
- Prevent unauthorized erasure through password protection

Reporting & Certification

- Generate log reports
- Save erasure report in various formats like PDF, HTML & XML
- Generate erasure certificates

Data Erasure in three simple steps

Step 1

Install BitRaser

Step 2

Select file to erase

Step 3

Erase

Supported Erasure Standards

*17 internationally recognized standards supported - US Department of Defense, DoD 5220.22-M (3 passes), US Department of Defense, DoD 5200.22-M (ECE) (7 passes), US Department of Defense, DoD 5200.28-STD (7 passes), Russian Standard - GOST-R-50739-95, B.Schneier's algorithm (7 passes), German Standard, VSITR (7 passes), Peter Gutmann (35 passes), US Army AR 380-19 (3 passes), North Atlantic Treaty Organization-NATO Standard, US Air Force AFSSI 5020, Pfizner algorithm (33 passes), Canadian RCMP TSSIT OPS-II (4 passes), British HMG IS5 (3 passes).

Minimum System Requirements

Operating Systems: Windows 10 / 8.1 / 8 / 7 / Vista / XP, Pentium Class Processor, RAM: 2 GB, Hard Disk: 40 MB of free space
