

ROBUST. HIGH PERFORMENACE ULTIMATE FORENSIC TOOLKIT

Ideal for Law Enforcement, Digital Forensic Labs & Govt. Agencies

- ✓ Forensic acquisition and extraction of digital evidence.
- ✓ Advanced mobile data extraction (iPhone® and Android®).
- ✓ Legally admissible forensic reports with hash validation.

**TECHNOLOGY PROUDLY
DEVELOPED IN INDIA**

Powerful Forensic Toolkit to Acquire, Examine and Recover Data

Stellar Forensic Toolkit is a powerful all-in-one solution designed for end-to-end digital investigations. It integrates Stellar's core software modules to enable evidence acquisition, analysis, and data recovery across Windows®, macOS®, and Linux® platforms. Additional capabilities include data extraction from iPhone® and Android® devices, Windows backups (Tivoli®, Symantec®, Veritas®, HP® Data Protector etc.) acquired during evidence seizure, remote imaging, hash verification, Windows password recovery, and secure data erasure.

SOFTWARE WITH EXCELLENT CAPABILITIES

Evidence Acquisition

Create forensic image from both logical volumes and physical drives locally or over a remote connection. It supports E01, DD, normal, compressed, fragmented, and fragmented-compressed image file formats.

Investigate Existing Digital Artifacts

Seamlessly loads and analyzes acquired disk images, memory dumps, and other digital evidence. It supports a wide range of industry-standard image formats, including EX01, E01, BIN, DD, AFF4-L, AFF, ZIP, and TAR.

Intuitive Hash Validation

Support for MD4, MD5, SHA256, SHA512, Keccak_256, and Keccak_512 hash algorithms allows for dynamic hash generation in an easy-to-navigate HTML view, speeding up forensic analysis.

File Search & Tagging

Forensic toolkit offers intelligent file tagging and categorization based on properties and photo source DNA. It also includes powerful keyword searching for quick retrieval of relevant files.

Forensic Data Backup Extraction

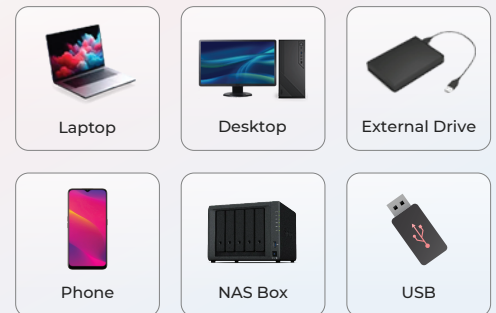

Examine and recover data from seized Windows backup files without needing the original software. The toolkit also recovers all data for forensic analysis from inaccessible or corrupt files, ensuring complete content restoration.

Password Recovery

Reset login password from seized computers, laptops and servers. The Password Recovery for Windows tool supports both BIOS and UEFI boot modes.

Storage Devices Supported

Testimonial

"Stellar Data Recovery Services possess the technical expertise in data recovery, which was immensely experienced by the undersigned during the data loss from SSD drive."

Sr. Director/Scientist 'G'
Ministry of Electronics and Information Technology

PRODUCT FEATURES

Category	Features
Computer Forensics	Acquire, examine and recover data from Laptop, Desktop, External Drive, USB Drive
	Support for Virtual machine recovery and RAID Server
	Mount, recover and analyze forensic disk image
	Supported File System: FAT, exFAT, NTFS, HFS, HFS+, APFS, EXT2, EXT3, EXT4, BTRFS
Mobile Forensics	Examine and analyze mobile artifacts
	Forensic data recovery for iPhone® and Android® phone
	Recover deleted video, audio and photo
	Support for all iOS devices & backups
Backup Forensics	Support IBM Tivoli®, Symantec® BKF, Symantec NetBackup, Veritas® BKF, Brew® Backup, Arcserve® Backup
	Extract Data from Native Windows Backup files
	Support VHDX, BKF, ZIP, FD
Data Wiping	Securely erase data from HDD, SSD and loose drive
	Support 26+ International standard of wiping including NIST 800-88, DoD 5220.22-M, IEEE 2883:2022
	Tested, approved & certified by NIST, Common Criteria, ADISA
	Generate report and certificate of data eraser

SYSTEM REQUIREMENTS

Processor
Intel-compatible (x64)

Memory
32 GB minimum

Hard Disk
500 MB for installation files

Operating System
Windows 11 & 10

PRODUCT DELIVERY

Offline Edition
Stellar forensic toolkit is delivered with a USB hardware lock for secure, standalone use that can function without Internet connectivity.

WHY CHOOSE STELLAR?

30+
YEARS OF EXCELLENCE

3M+
HAPPY CUSTOMERS

100+
R&D ENGINEERS
