Stellar Data Recovery Gears Up for INFOCOM 2025

Championing Business Continuity and Data Security with Certified Data Erasure

Kolkata, November 2025 – Stellar Data Recovery at INFOCOM 2025 Stellar Data Recovery, a global leader in data care solutions, will feature as an Associate Partner and key exhibitor at **INFOCOM 2025**, India's premier business-technology conference, held at the Hyatt Regency, Kolkata. The company's presence underscores its commitment to addressing rising enterprise challenges in data security, regulatory compliance, and environmental sustainability. At the event, Stellar will showcase its advanced suite of data recovery, file repair, and email conversion solutions, with a strong focus on live demonstrations of **BitRaser**, its globally certified data erasure and sanitization tool.

Over Three Decades of Trusted Data Care

With over 30 years of experience across India, the US, and Europe, Stellar has built a legacy of innovation and compliance, holding **ISO 9001** (Quality Management) and **ISO 27001** (Information Security Management) certifications. The company provides end-to-end expertise in data governance, from creation and storage to secure, verifiable disposal. INFOCOM 2025 reinforces Stellar's role in equipping businesses with tools to maintain data integrity amid complex regulatory and digital environments.

Spotlight on BitRaser: The Mandate for Secure Erasure

Secure data erasure has become a vital compliance requirement under modern regulations such as **India's Digital Personal Data Protection (DPDP) Act, 2023.** Devices retired or upgraded without proper sanitization risk exposing sensitive business and personal information—including banking credentials, PAN, Aadhaar, and corporate data—potentially causing financial losses, reputational damage, and privacy breaches.

BitRaser: The Solution for Verifiable Sanitization

BitRaser addresses this challenge as a certified solution for permanent data sanitization across:

- **Endpoint devices:** laptops, desktops, and mobile phones
- **Enterprise infrastructure:** servers and storage systems
- **Modern platforms:** cloud data

BitRaser ensures complete protection against data breaches while supporting **Data Minimization** and providing an **Audit Trail** for regulatory compliance. It **auto-generates detailed erasure reports** and certificates recognized under the **DPDP Act, GDPR, and ISO 27001.**

A "Make in India" Solution with Global Standards

BitRaser is a 100% **"Make in India"** product and holds the Common Criteria certification from **STQC, MeitY,** validating its security assurance. Affordable and accessible, it suits Indian corporates, government organizations, and individual users. The solution is scalable, capable of remotely erasing thousands of devices simultaneously, and supports **26 international erasure standards, including NIST 800-88 Clear and Purge, US DoD 3/7 passes, and IEEE 2883:2022.**

Sustainability and Reuse

Beyond compliance, BitRaser enables **environmental responsibility** by securely sanitizing storage media for reuse, resale, or recycling, reducing electronic waste and supporting corporate sustainability initiatives.

Global Leadership and Commitment

Headquartered in Gurugram, India, Stellar serves millions of users in 190+ countries. Through certified software and professional services, it empowers organizations to achieve compliance, accountability, and sustainability as digital infrastructures grow more complex.

At INFOCOM 2025, visitors can experience live BitRaser demonstrations, consult Stellar's leadership, and explore integration strategies for safer, more sustainable digital operations. **BitRaser is emerging as a strategic enabler of compliance, accountability, and sustainability for enterprises and public sector organizations across the globe.**

Visitors to INFOCOM 2025 will have the opportunity to experience the live demonstrations of BitRaser.
